

Praveen Kumar M

Python Developer | Flask & Backend Development

9025201762 | praveenbcom48@gmail.com | github.com/Praveen-012k | linkedin.com/in/praveen-kumar-31845124b | Erode, Tamil Nadu, India

PROFESSIONAL SUMMARY

Self-taught Python Developer with hands-on experience building full-stack web applications, automation tools, and API integrations. Completed Angela Yu's 100 Days of Code: The Complete Python Pro Bootcamp, covering Flask web development, database design and deployment, and data analysis with Python. Has deployed a live, production-ready Flask web application and built multiple automation projects integrating third-party APIs. Brings a background in data annotation and financial services, contributing strong analytical thinking and attention to detail to software development.

TECHNICAL SKILLS

Languages: Python, SQL (basic), HTML, CSS

Frameworks & Libraries: Flask, Flask-SQLAlchemy, Flask-Login, Flask-WTF, Flask-Gravatar, Bootstrap, Pandas, Matplotlib, Plotly, Seaborn, Scikit-learn

APIs & Integrations: REST APIs, Twilio, SerpAPI, Sheety API, Airlabs API, OpenWeatherMap, Open Trivia DB

Web Scraping: BeautifulSoup, Selenium

Tools & Platforms: Git, GitHub, PyCharm, Render, PostgreSQL, Postman, Jupyter/Colab, Microsoft Excel

Core Competencies: OOP, Database Design, API Integration, Web Deployment, Automation, Data Analysis, GUI Development

WORK EXPERIENCE

Image Content Moderator

2024 — Present

BPO — Jodel App Client | Erode, India

- ❖ Review and moderate user-generated images ensuring compliance with platform community guidelines
- ❖ Maintain high accuracy and throughput during night shifts in a fast-paced, volume-driven environment
- ❖ Developed strong attention to detail and consistent decision-making under pressure

Data Annotation Specialist

2023 — 2024

Amazon AWS — Autonomous Vehicle Project | Remote

- ❖ Annotated and labeled complex datasets for machine learning models used in autonomous vehicle systems
- ❖ Maintained strict annotation accuracy standards across high-volume datasets with quality benchmarks
- ❖ Gained exposure to ML data pipelines and the importance of clean, structured training data

Business Executive

2022 — 2023

Shreeram Finance | Erode, India

- ❖ Managed client relationships and processed financial documentation for loan and insurance products
- ❖ Handled data entry and record management using Excel and internal CRM systems

PROJECTS

Flask Blog Application *Python · Flask · SQLAlchemy · PostgreSQL · Flask-Login · WTForms*

- ❖ Built a multi-user blog platform with secure authentication and admin-only post permissions using Flask-Login
- ❖ Designed one-to-many database relationships between users, posts, and comments with Flask-SQLAlchemy
- ❖ Integrated CKEditor for rich text post creation and Flask-Gravatar for automatic user avatars
- ❖ Deployed live on Render with a PostgreSQL production database and environment-based configuration

Movie Budget Analysis *Python · Pandas · Seaborn · Scikit-learn · Linear Regression*

- ❖ Conducted exploratory data analysis on film production budgets and worldwide box office revenue
- ❖ Found that 37.2% of films fail to recoup their production budget, with the bottom quartile consistently losing money
- ❖ Built and compared linear regression models across different eras, showing budget predicts revenue far more reliably for modern films than older ones

Flight Deal Finder *Python · SerpAPI · Twilio · Sheety API · Airlabs API*

- ❖ Automated flight price monitoring system tracking fares from London to multiple destinations via Google Flights
- ❖ Integrated Airlabs API for IATA code lookup and Sheety API for Google Sheets-based data management
- ❖ Sends automated SMS alerts via Twilio when flight prices drop below a target threshold, orchestrating four APIs in one pipeline

Weather Alert SMS App *Python · OpenWeatherMap API · Twilio*

- ❖ Monitors weather forecasts and sends automated SMS rain alerts using the OpenWeatherMap API
- ❖ Implemented secure credential handling with environment variables via python-dotenv

Language Flashcard Application *Python · Tkinter · Pandas*

- ❖ Built an interactive flashcard app for French vocabulary with automated card flipping and CSV-based progress tracking

Quiz Game with API Integration *Python · Tkinter · Open Trivia API · OOP*

- ❖ Built a True/False quiz app fetching real-time questions from Open Trivia DB with a modular OOP architecture

Password Manager *Python · Tkinter · JSON*

- ❖ Built a desktop password manager with random password generation, clipboard copy, and secure JSON storage

Birthday Email Automation *Python · Pandas · SMTP*

- ❖ Automated birthday emails with randomized templates, personalized content, and SMTP delivery

Coffee Machine Simulator (OOP) *Python · OOP*

- ❖ Demonstrated OOP principles with CoffeeMaker, Menu, and MoneyMachine classes and inventory tracking

EDUCATION & CERTIFICATIONS

Bachelor of Commerce (Computer Applications)

2023

Erode Arts and Science College | Erode, Tamil Nadu

100 Days of Code: The Complete Python Pro Bootcamp

Completed

Udemy — Angela Yu | Web Development, Flask, and Data Science with Python
